

CHEMICAL EXPRESS RELEASES ITS 2024 SUSTAINABILITY REPORT

Chemical Express, a leader in the transport of liquid and hazardous chemicals, has unveiled its 2024 Sustainability Report, reaffirming the company's strong commitment to environmental protection, social inclusion, and responsible governance.

The report, developed in collaboration with the University of Naples Federico II, details the company's achievements and outlines its roadmap toward a more sustainable and transparent business model. It is now available on the company's official website.

Highlights from the 2024 Report

Environmental Sustainability

- Significant reduction in CO₂ emissions per kilometre travelled.
- Expanded use of intermodal transport, minimising environmental impact.
- Continued investment in renewable energy, particularly through

photovoltaic installations.

- Adoption of Hydrotreated Vegetable Oil (HVO) as a clean and efficient alternative fuel.

Social Responsibility

- A diverse and multicultural workforce, with over 35 percent of employees representing different nationalities.
- Greater female participation in technical roles, exceeding industry averages.
- New membership in the association Women in Logistics
- Active collaboration with schools and universities through internships and work-based learning programmes (PCTO), providing young people with valuable training and career opportunities.

Ethical Governance

- Strengthened transparency and accountability in corporate management.
- Continued dedication to ethical and responsible business conduct.

"The publication of our 2024 Sustainability Report reinforces our dedication to sustainability, innovation, and social progress," said Francesco Mattozzi, Chemical Express account manager. "Through our partnerships with the University of Naples Federico II and local educational institutions, as well as our involvement in initiatives like Women in Logistics, we are investing in people, communities, and a more equitable and sustainable future."

Chemical Express views sustainability not only as a responsibility but as a strategic pillar for growth, competitiveness, and long-term value creation.
